Examination on the course ODE 2 (MATM27), Spring 2018

- MATM27 is examined through a written and an oral exam at the end of the course.
- The written exam consists of 5 problems with equal weight (5 p). The limit for passing the exam is 12.5 p.
- If you pass the written exam, you also need to pass the oral exam in order to pass the course. The questions for the oral exam will be made available on the course homepage at least two weeks before the written exam.
- You can get at most 10 points on the oral exam. In order to pass the oral exam you need to answer approximately half the questions you get correctly. If you fail the oral exam you get one additional chance to pass it.
- The grade on the course, G (pass) or VG (pass with distinction), is determined by the results on the written exam and the oral exam. The limit for VG will be about 75 % of the total points (ca 26 out of 35 points). The exact limit will be announced in connection with the oral exam.
